TITLE: The interaction of parallel turbulent jets

SOURCE: Energia es Atomtechnika, no. 2-3, 1965, 91-97

TOPIC TAGS: ^{1.55} turbulent jet, ^{1.55} flow density, ^{1.55} flow distribution

ABSTRACT: The authors use the Reichardt inductive theory to describe the interaction of two turbulent, parallel jets. This theory was resorted to because there is as yet no better theory available. Reichardt maintains, that with the determination of the experimental characteristics of turbulence, it is extremely difficult to compare the deductive theories because of the inevitable dispersion. The equation for the impulse flow density distribution of parallel jets flowing from several nozzles is derived on the basis of the Reichardt hypothesis by using the principles of superposition which, with the empirical determination of the equations for the case of jets of different density and injection velocity, is of general validity. The members in this equation may be obtained from a table. The authors are to report on the experimental data. Orig. art. has: 27 formulas and 4 figures.

An analysis of the "sympathomimetic" action of histamine on isolated mammalian heart preparations. I. Went, E. Varga, E. Szucs, and O. Fehér (Physiol. Inst. Med. Univ., Debrecen). *Acta Physiol. Acad. Sci. Hung.* 5, 121-30 (1954) (in German).—Histamine (H) elicited a biphasic response in isolated, perfused hearts of guinea pigs, cats, rats, and rabbits. The primary depressant action was not prevented by atropine or ergotamine (E). The secondary adrenaline-like effects (I) were antagonized by E. Following the administration of H the perfusates contained a substance which produced I on various tissues and which was dialyzable and was inactivated by boiling at pH 8 for 5 min. S. Ellis

Biphasic and reversed action of adrenaline on the perfused rabbit heart. L. Went, E. Szucs, and T. Kovács (Med. Univ., Debrecen). *Acta-Physiol-Hung. Sci. Hung.* 6, 47-55(1954).—Adrenaline (I) first stimulated and then depressed the isolated, perfused rabbit heart. Ergotamine prevented the stimulating effect of I and allowed the reversed, depressant effect to occur. Atropine inhibited only the depressant effect of I. Since the perfusate obtained during the depressant phase elicited an acetylcholine-like effect on the frog heart, the reversed effect of I was attributed to the release of acetylcholine. S. Ellis

Title : New Instrument for Registration of Ordinates

Orig Pub : Acta physiol. Acad. sci. hung., 1957, 11, No 3-4, 309-316

Abstract : A description is given of an electron instrument which simultaneously records on a kymograph by the drop method the two processes controlling the reaction of denervated and control vessels. The instrument consists of two independently functioning systems and combined ordinate recordings. The frequency of the registered impulses is 0.130 per minute.

/ Reaction between Ce(IV) ions and peroxysulfuric acid.
L. J. Csányi, F. Solymosi, and J. Szuca (Univ. Szeged,
Hung.). *Naturwissenschaften* 46, 333(1959)(in English).
With $\text{Ce}(\text{SO}_4)_2$ and in the presence of SO_4^{--} the decompn. of
 H_2SO_5 in 1 min. increases in proportion to the concn. of
 Ce^{4+} ions. However, the decompn. reaches 80% even
when the initial concn. of Ce^{4+} is 0.1 the amt. of H_2SO_5 .
When Ce^{3+} is added, the decompn. decreases, depending
on the ratio of Ce^{4+} to Ce^{3+} . If this value reaches 0.1,
the decompn. practically stops. The data show that the
decompn. cannot be described by a simple stoichiometric
equation. The amt. of O evolved is a little greater than
that calcd. from the equation $\text{H}_2\text{SO}_5 \rightarrow \frac{1}{2}\text{O}_2 + \text{H}_2\text{SO}_4$, and
indicates a side reaction. No O_2 is detected in the evolved
 O . With $\text{Ce}(\text{NO}_3)_3$, the presence of NO_3^- causes the reaction
between H_2SO_5 and Ce^{4+} to be more rapid than in the
presence of SO_4^{--} . The rate of reaction, contrary to expts.
with $\text{Ce}(\text{SO}_4)_2$, increases on the addn. of Ce^{3+} and 2 to 3
times the Ce^{4+} disappears. In the presence of SO_4^{--} in
soln. nonreacted Ce^{4+} always remains; in the presence of
 NO_3^- , the ratio of H_2SO_5 and Ce^{4+} being 5:1 or less, all
 Ce^{4+} rapidly disappears. Over a longer period, however,
 H_2SO_5 reacts quant. On adding SO_4^{--} or $\text{C}_2\text{H}_3\text{O}_2^-$ to
 $\text{Ce}(\text{NO}_3)_3$ soln. the rate of decompn. decreases. The de-
compn. of H_2SO_5 may be ascribed to the free, non-complexed
 Ce^{4+} ions.

"Extensive Loss of the Skin of the External Male Genitalia due to Chemical Injury, Replaced by Skin of Medium Thickness."

Budapest, Orvosi Hetilap, Vol 104, No 39, 29 Sep 63, pages 1855-1856.

Abstract: [Authors' Hungarian summary] Data in the literature indicate that chemical injury to the external genitalia is extremely rare. No report of this kind has been found in the Hungarian medical literature. The most suitable repair of such injuries consists of a possibly early necrectomy followed by free transplantation of skin of medium thickness. If this can not be carried out for any reason, than the lifeless skin must be removed after demarcation along with any fresh tissue, followed by skin transplantation. This procedure promises the best functional and cosmetic results. 16 Eastern European, 6 Western references.

TITLE: Method and equipment for automating potentiometric
titration with production accuracy

PERIODICAL: Referativnyy zhurnal. Avtomatika i radioelektronika,
no. 7, 1962, abstract 7-2-68 e (Hung. pat., cl. 42,
1, 3, no. 147383, Aug. 15, 1960)

TEXT: The object of the patent is a titration method according to which the voltage of the final titration point is connected in opposition to the voltage of the measuring circuit, as a consequence of which the output voltage of the measuring equipment becomes equal to zero when titration is completed. The equipment itself consists of a magnetic stirrer, a magnetically controlled valve, a pair of electrodes, a transformer, an electronic voltmeter, photo-elements, a stabilizer, a d.c. amplifier and a potentiometer. The addition of the measuring liquid is carried out through the electromagnetically controlled valve by means of a contact relay sensitive to polarity.

"Appendicitis on the Left Side."

Budapest, Orvosi Hetilap, Vol 107, No 48, 27 Nov 66, pages 2290-2291.

Abstract: [Authors' Hungarian summary] The symptoms of inflammation of the appendix located on the left side is described. A case is reported to demonstrate that the chief problems presented by similar cases are technical ones during the operation. Attention is called to the fact that, when pain in the lower left of the abdomen accompanies the typical symptoms of appendicitis, it may be indicative of a left-sided localization of the organ. 5 Eastern European, 7 Western references.

TITLE: Silver electrode of a silver-zinc cell and its method of preparation

PERIODICAL: Referativnyy zhurnal, Elektrotehnika i energetika, no.1, 1963, 21, abstract 1 A 132 P. (Hung. pat. cl.21b, 6 - 14, no.148897, December 31, 1961)

TEXT: The customary pressing of electrodes from Ag or Ag₂O powder utilises only 15-20% of their volume, because the electrolyte cannot fully penetrate. It is proposed to use a core of silver (e.g. spiral wire) with Ag₂O formed on its surface by electrolytic chlorination and subsequent electrolytic oxidation. The ratio of Ag to Ag₂O can vary from 1:100 to 100:1. The coating adheres well to the Ag and acts as a depolarizer. The discharge current can be up to 200 mA hr/g and the diameter of the wire for the core 0.3 - 0.4 mm.

"Up-to-Date Treatment of Extensive, Flayed Injuries of the Skin."

Budapest, Orvosi Hetilap, Vol 107, No 40, 2 Oct 66, pages 1904-1906.

Abstract: [Authors' Hungarian summary] In the case of extensive, flayed injury to the skin, the skin generally can not be reattached to the extremities since, because of the blood supply conditions of skin, it is incapable of surviving and will sooner or later die off. The most promising procedure is an immediate, free grafting of a half-thickness of skin. The flayed skin to be removed is suitable in every respect for the preparation of the half-thick skin. 2 Eastern European, 2 Western references.

AUTHOR: Szücs, József
TITLE: Technical novelties at Tushino - through a magnifying glass
PERIODICAL: Repülés, ¹⁴no. 10, 1961, 14-15

TEXT: The article reviews various aircraft seen at the 1961 Tushino Air Show. One of the four versions of the Yakovlev "Yak-25" fighters displayed at the Show, is shown in Fig. 1. This version has a glazed nose and two strikingly long engines supposedly fitted with afterburners. The wing center-section is delta-shaped and the overhanging leading-edge flaps probably automated. The unknown type of aircraft shown in Fig. 2 and 2a has sharply-swept low wings and delta-shaped center-section. The power landing gear housing projects beyond the wing trailing edge. The power plants are located on both sides of the forward part of the fuselage. During the display this aircraft carried guided missiles under the wings. Another unknown type of aircraft shown in Fig. 3 and 3a, has the engines on both sides of the vertical tail above the fuselage, a heavy automatic radar-controlled backward-shooting tail cannon, and a retractable air re-

25129

Technical novelties at Tushino - through a magnifying glass

achieved with the help of a ventral assisted-take-off rocket, thought to be fueled with solid propellant. This aeroplane has an adjustable conical body in the center of the circular air intake orifice, an air intake under the wing center-section and a parabrate box behind the rudder. The Sukhoi can develop a speed of Mach 2 and can take off and land on short sod-surface runways. Lt. Col. Mosolov flew an aircraft, thought to be an "E-66", powered by jet and rocket power plants. It was impossible to photograph this aircraft due to the intense exhaust flame ejected from the liquid-propellant fueled rocket engine. In addition to the aircraft described above, Yak-18, Yak-32, Mig-19, Mig-21, An-10, An-12, An-14, An-24, TU-104, TU-114, TU-124, Il-18, An-2, Il-14 aeroplanes as well as Mi-1, Mi-4, Mi-6, Ka-18 and Yak-24 helicopters took part in the Tushino Air Show. There are 10 figures. /Abstracter's note: Essentially complete translation⁷.

SZUCS, Jozsef

Mechanization of hydraulic engineering. Musz elet 17 no.6:10
Mr '62.

SZUGS, Jozsef

From the branch to the water-jet steering wheel. Elet tud 17 no. 14:
423-426. Ap '62

SZUCS, Jozsef

Tisza II; a barrage. Elet tud 17 no.26:819-822 1 JI '62.

SZUCS, Jozsef

"Flying" ships. Elet tud 17 no.37:1159-1162 16 S '62.

SZUCS, Jozsef

Is it true that the large seagoing ships are towed by little steamers through the Suez Canal? Elet tud 17 no.42:1336 21 0 '62.

1. Fokonstruktor.

SZUCS, Jozsef...

On the back of air currents. Elet tud 16 no.31:973-975 30 J1 '61.

SZUCS, Jozsef

Articulated vehicles on the soil, water and in the air. Elet tud 16
no.34:1067-1070 20 Ag '61.

SZUCS, Jozsef

Kossuth-prize winning aircrafts. Elet tud 18 no.24:743-746
16 Je '63.

SZUCS, Jozsef

Report on the Brno Fair. Klet tud 18 no.41:1307-1309
13 0 '63.

SZUCS, Jozsef

Ergology of automobiles. Pt. 1. Elet tud 18 no.45:1427-1431
10 N '63.

SZUCS, Jozsef

Ergology of automobiles. Elet tud 18 no.46:1450-1453 17 II '63.

SZUCS, Juraj, inz.

Water level measurement in Czechoslovak water-power stations.
Energetika Gz 11 no.5:215-219 My '61.

SZUCS, Juraj, inz.; CARABA, Juraj, inz.

Continuous remote signaling in the water resource management.
Vodni hosp 14 no.4:127-129 '64.

1. Management of Water Resource Development, Bratislava.

SZUCS, Juraj, inz.

Automatic control of pumping stations by wireless transmission.
Vodni hosp 14 no.9:335-337 '64,

1. Management of the Water Resources Development, Bratislava.

SZUCS, Kalman

Tens of thousands of acres are awaiting 600 machines.
Mezogazd techn 1 no.5:4-5 '61.

SZUCS, Kalman, dr.

Problems of bread grain production in Hungary. Term tud
kozl 8 no. 2: 83-86 F '64.

1. Foldmuvelesugyi Miniszterium osztalyvezetoje, Budapest.

ENDES, P.; DAUDA, G.; DEVENYI, I.; SZUCS, L.

Pressor effect of kidney extracts and their relationship to the
juxtaglomerular granular cells. Acta physiol. acad. sci. Hung.
27 no.4:349-351 '65.

1. Department of Pathology, University Medical School, Debrecen.

SZUCS, Laszlo, gepeszmernok

Hungarian design of hydraulic servo-steering unit. Jarmu mezo
gep 9 no.10:378-380 0 '62.

PONGRAC, Endres, dr.; DAUDA, Gyorgy, dr.; DEVENYI, Istvan, dr.; SZUCS, Laszlo, dr.

Relation of the pressor activity of kidney tissue extracts and the juxtaglomerular granulation cell content of the kidney.
Orv. hetil. 105 no.48:2282-2283 29 N '64.

1. Debreceni Orvostudományi Egyetem, Kórházintézet.
